Art Unit: 1724

Restriction is required under 35 U.S.C. § 121 and § 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Group I, claims 1-8, 13-16, 18, 20 and 21, drawn to a modified silica gel, and process for its preparation; and

Group II, claims 9-12, 17 and 19, drawn to a process for removing a constituent from a liquid.

The special feature linking the two groups is the modified silica gel, which modified silica gel does not provide a contribution over the prior art, as evidenced by Matsui et al (U.S. Patent No. 5,380,510) in view of Ramsden et al (U.S. Patent No. 4,650,784). See section V of the International Preliminary Examination Report dated May 8, 2000.

In accordance with 37 CFR § 1.499, Applicant is required, in response to this office action, to elect a single invention to which the claims must be restricted.

Furthermore, if the invention of Group II is elected, then an election of species is also required. This application contains claims directed to the following patentably distinct constituent removed species of the claimed invention:

(I) metal; and

(II) organic chemical.

Art Unit: 1724

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed constituent removed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 17 is generic.

Applicant is advised that a response to this requirement must include an identification of the species that are elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, Applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should Applicant traverse on the ground that the species are not patentably distinct, Applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the

inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (703) 308-3840. The examiner can normally be reached on Monday through Friday from 9:30 AM to 6:00 PM.

The fax phone numbers for this art unit are: (703) 872-9311 for "Official" faxes after Final Rejection; (703) 872-9310 for all other "Official" faxes; and (703) 872-9492 for "Draft" and other "Unofficial" faxes.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
